Fuel Cartridge, Fuel Cell and Portable Electrical Appliance Including Fuel Cell

Examiner: Suitte 10/596,275 Art Unit: 4191 April 21, 2008

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

 This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

 In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-5, drawn to a fuel cartridge with a gas housing chamber that houses the fuel gas.

Group II, claims 6-8 and 10-12, drawn to a fuel cell with a discharge amount control section.

Group III, claims 9 and 13-18, drawn to a fuel cell with an oxidizing treatment section.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I requires a gas housing chamber that houses the fuel gas which is not required by Group II and Group III, Group II requires a discharge amount control section which is not required by Group I and Group III, and Group III requires an oxidizing treatment section that is provided which is not required by Group I and Group II.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
